

THE DVC: TEACHING AND LEARNING OFFICE

Cordially invites you to an institution-wide Seminar on

Harnessing the Power of Learning Experience Design (LXD) in the Digital Age

[Register Here >](#)

 28 September 2023

 10h00 - 12h00

 Zoom

SEMINAR OVERVIEW

In this seminar, we explore the critical nuances of Learning Experience Design (LXD) as a human-centered practice leading to specific educational outcomes. Drawing on insights from the latest research, the discussion navigates the common challenges that novice designers face, particularly in defining learning objectives and understanding learner context. The seminar emphasizes the importance of "thinking, feeling, and sensing like an expert," facilitating a lens through which we can dissect complex learning scenarios into discrete outcomes and goals. By doing so, we can index, organize, and tailor design solutions grounded in evidence-based principles to foster rich learning experiences across diverse digital platforms. Join us for a thought-provoking conversation that melds experiential design, digital innovation, and EdTech into a unified framework

FACILITATOR

Professor Jin Kuwata

Lecturer in the Communication, Media, and Learning Technologies Design Program at Teachers College,

Columbia University

He is a learning experience designer, software developer, and instructor focusing on applied research and development at the intersections of these spaces. He enjoys spending much of his time thinking about how to prepare future designers and educators, and the ways that we observe and understand phenomena during problem solving endeavours. He directs the COGMOS Design Lab that explores how interactive software and systems can approach learning problems in novel ways that complement the cognitive and social aspects of human thinking, feeling, behaviours, and interactions. Jin holds an Ed.D., M.Ed. in Instructional Media and Technology, and an M.A. in Education Leadership from Teachers College, Columbia University.
